Breathe easy indoors by avoiding products that contribute to air pollution

Even as a sport-loving nation, Australians still prefer to spend a large amount of their time indoors—we simply love our homes.

And though we may sometimes be taking refuge from the ill-effects of our harsh climate, there are health risks

inside the home, too. Indoor air can be three times more polluted than outdoor air and, according to the Environment Protection Agency, is one of the top five hazards to human health.

The leading causes of unhealthy >
